A Powerful Admin Experience for Creator Commerce

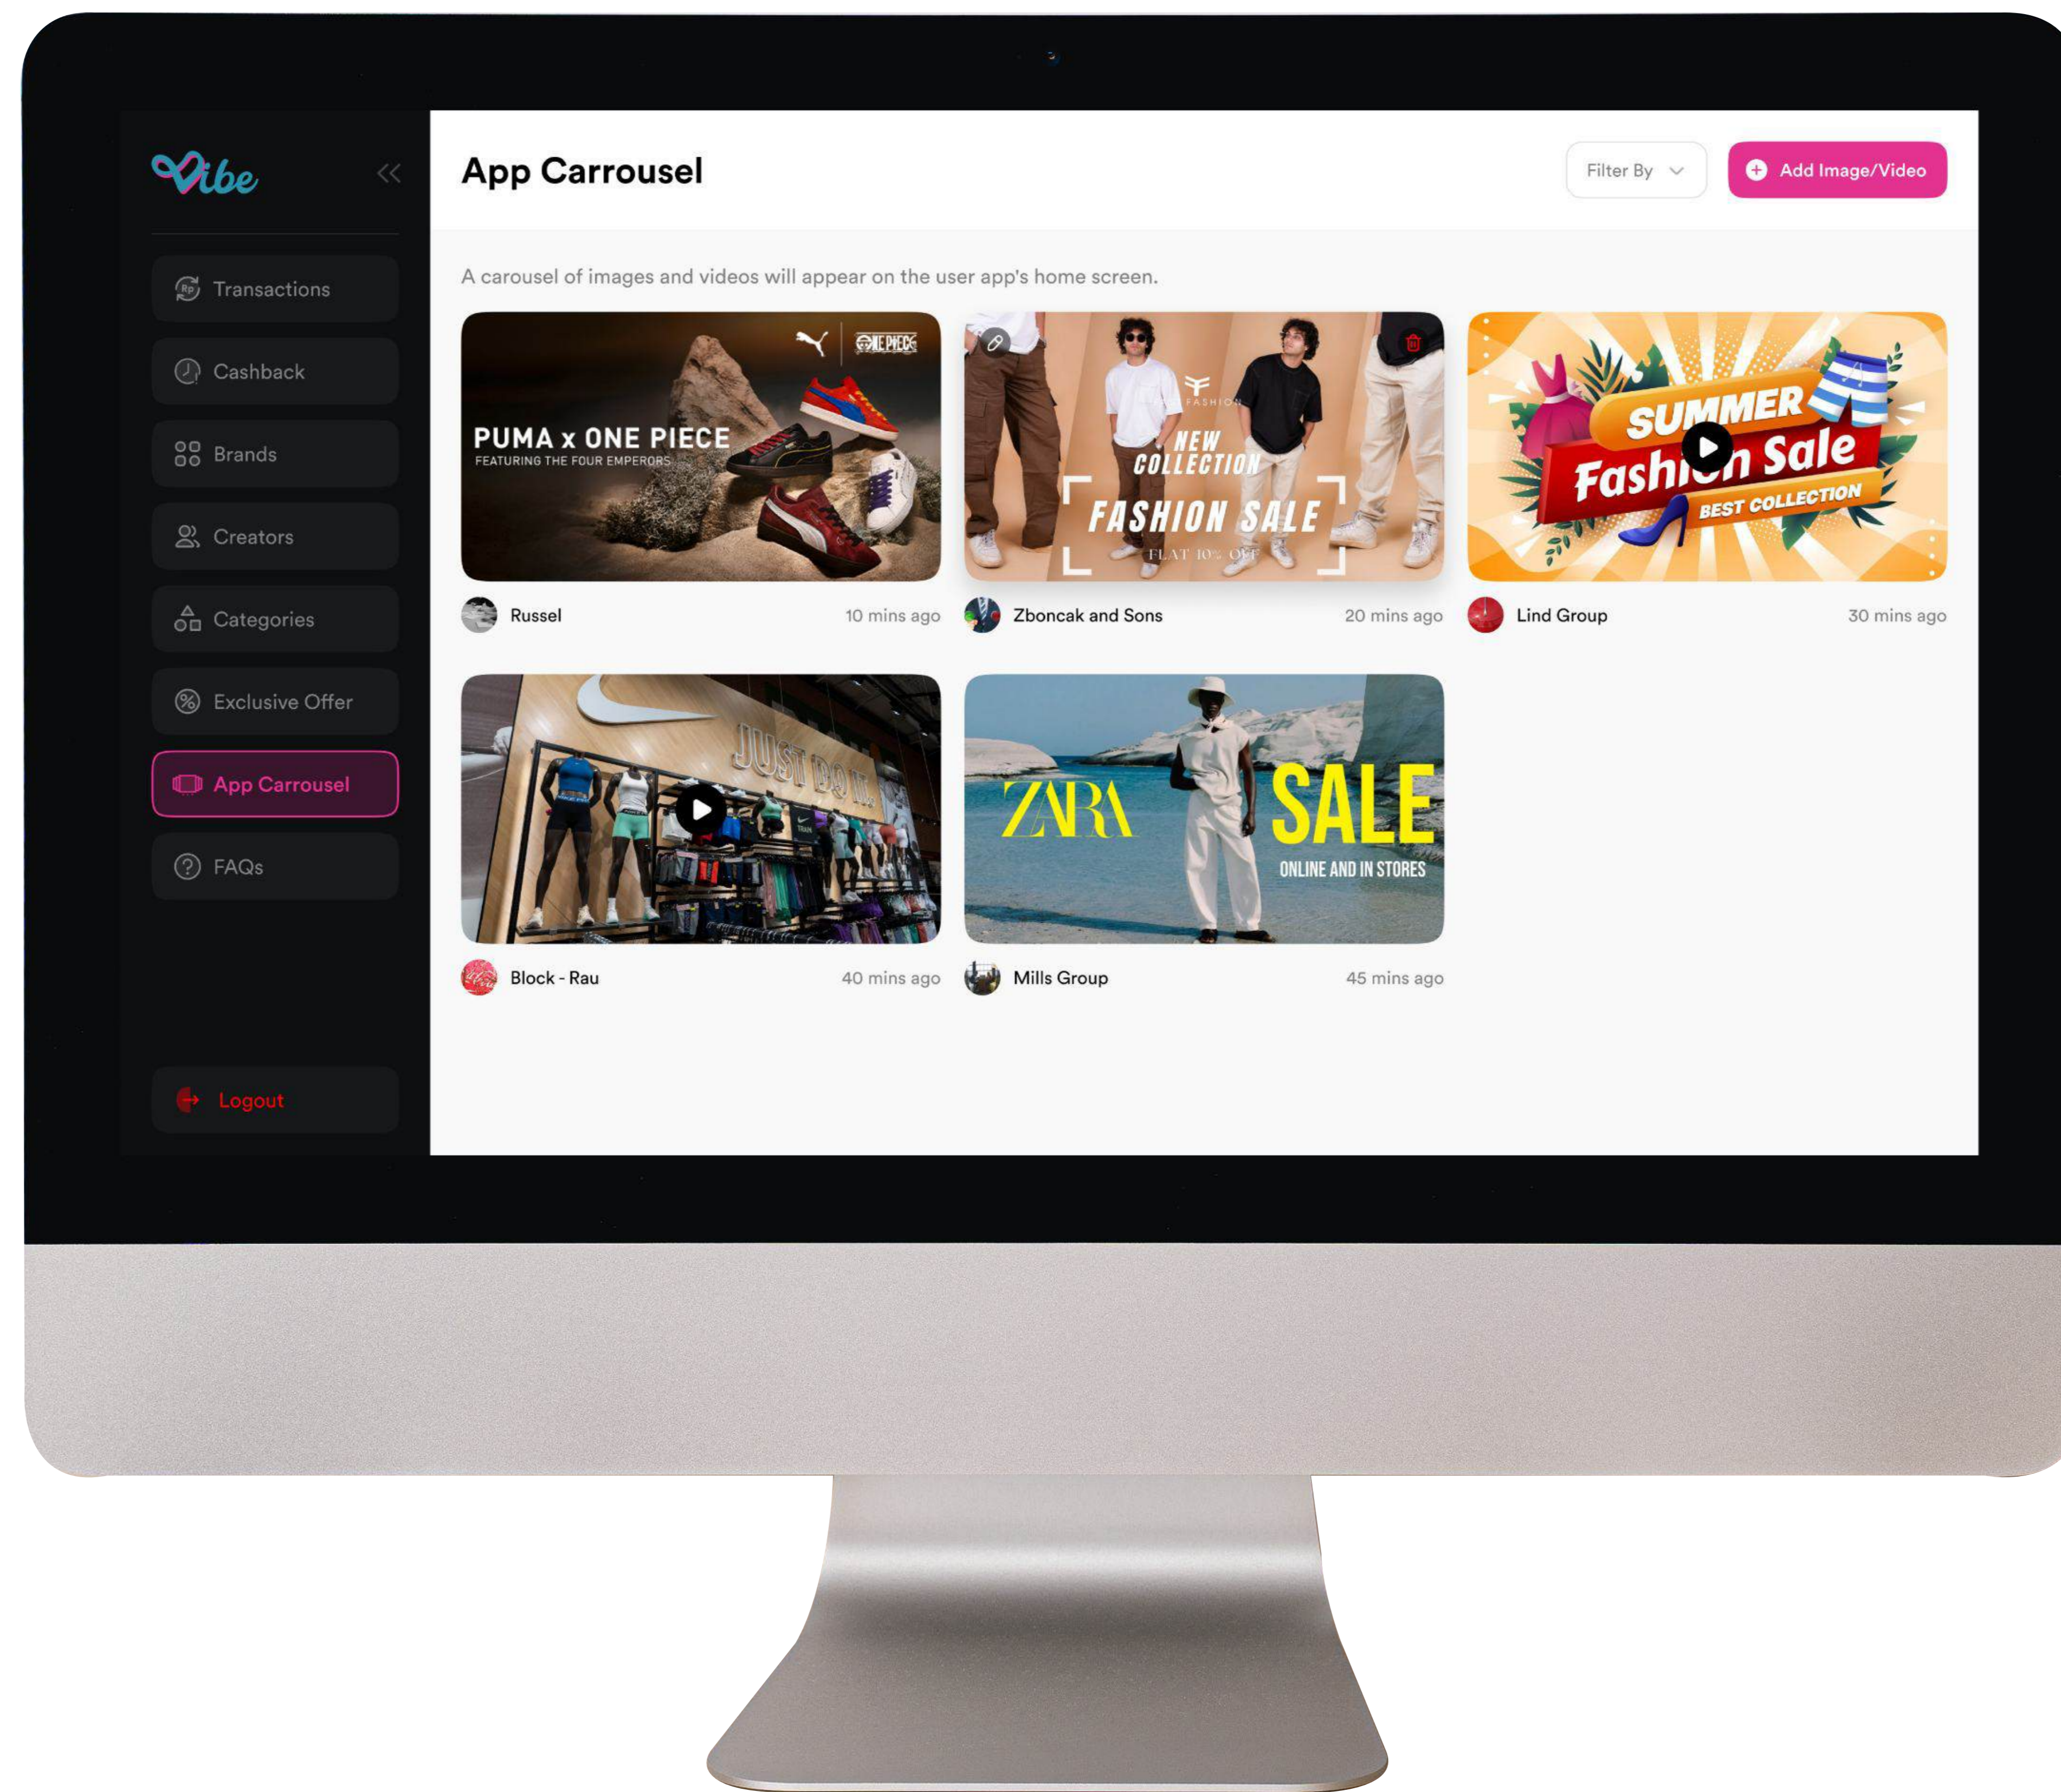

Vibe Admin Portal is a comprehensive backend platform designed to manage and scale a creator-driven commerce ecosystem. Built with a focus on clarity, control, and performance, the portal enables seamless management of transactions, cashback flows, brand partnerships, and creator activities — all from a unified dashboard.

The experience blends fintech-grade data handling with intuitive admin UX, allowing teams to monitor real-time transactions, approve or reject cashback requests, manage brands and creators, and control platform-wide operations with precision. Every interaction is designed to reduce friction and improve operational efficiency.

Designed for scalability, the admin system supports high-volume transaction tracking, structured data visualization, and flexible content management including categories, exclusive offers, and app carousels. From financial oversight to content moderation, Vibe Admin Portal ensures complete visibility and control over the platform while maintaining a clean and user-friendly interface.

Industry: Creator Economy / Fintech

Technology Category: Admin Dashboard / Management System

App Carrousel Management

Easily manage the content displayed on the user app's home screen. The Vibe Admin Portal allows admins to upload, organize, and control promotional banners, brand campaigns, and media assets in real time.

With built-in filtering and quick actions, teams can ensure that the most relevant offers and brand visuals are always prioritized for users.
